About Mechanical Department

Mechanical engineers are involved with the design, analysis, testing, manufacturing, control, operation, and maintenance of, any system that has a moving part. It deals with all aspects of the conversion of thermal energy into useful work and the machines that make this possible. If you are intrigued by how things work, fascinated by robots and automobile engines, then mechanical engineering may be the profession for you.

The department of Mechanical Engineering was established

in the year 2003 with an initial intake of 60 students and further a section with 60 students is added in the year 2009. The current intake is 120. The department is also offering M.Tech program in CAD/CAM with an intake of 18 students since 2013.

The department houses well equipped state of art laboratories and one center of excellence in which the students are encouraged to do in house research projects. Mechanical Engineering deals with the formulation, design, development and control systems and components involving solid mechanics, dynamics and controls, fluid mechanics, heat and mass transfer, manufacturing and conversion of energy into useful work. Industries that use mechanical engineers are involved in robotics, computer aided design/manufacturing (CAD/CAM), automotive/transportation, air-conditioning and refrigeration and having center of excellence in CAD/CAM domain.

M.Tech (Computer Aided Design / Computer Aided Manufacturing) is a two year full time post-graduate programme started in 2013 with an intake of 18. This course is approved by the All India Council of Technical Education (AICTE) for the students who have a B.E / B. Tech in any Mechanical Engineering. The course is offered by the Department of Mechanical Engineering by highly qualified and experienced teaching faculty.

The Course offers core subjects like Advanced CAD, Advanced FEM, DFM, Precision Engineering, CFD, Numerical Methods, Advanced CAM, Industrial Robotics, DH&PS, FMS, and Automation in Manufacturing etc.

A dedicated project work is taken up by every student for the next two semesters. The project work is of high quality basing used in current industry practices. Project work is supported by leading MNC's and defense laboratories doing state of art research and development.

Department of Mechanical Engineering

Vision of the Department

The Mechanical Engineering Department strives to be recognized by creating centers of excellence in the field of Mechanical Engineering and promoting Entrepreneurship with Value-based teaching – learning process.

Mission of the department

The Mechanical Engineering Department strives to impart quality education to the students by enhancing their skills to make them high quality Mechanical Engineers and to provide state of art research facilities, for the students to enhance their technical knowledge for the development of industry.

Mechanical Engineering Programme: Objectives and Outcomes

	Programme Educational Objectives (PEOs)				
PEO1	The graduates will apply technical knowledge and skills as Mechanical Engineers to provide optimal solutions in industrial and government organizations.				
PEO2	The graduates of Mechanical Engineering will pursue advanced education, research and development and other creative and innovative efforts in science, Engineering and Technology, as well as other professional careers.				
PEO3	The graduates of the programme will practice professional and ethical responsibilities including the societal impact of Engineering solutions.				
PEO4	The graduates of the programme will practice as leaders in their fields of expertise and in activities that support service and economic development nationally and throughout the world.				

	Programme Objectives (POs)				
P01	Engineering knowledge : Apply the knowledge in mathematics, science, Engineering fundamentals and an Engineering specialization to the solution of complex				
POI	Engineering problems.				
	Problem analysis: Identify, formulate, research literature, and analyze complex				
PO2	Engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and Engineering sciences.				
	Design/development of solutions: Design solution for complex Engineering				
PO3	problems and design system components or processes that meet the specified needs				
	with appropriate consideration for the health and safety, and the cultural, societal, and environmental consideration.				
	Conduct investigations of complex problems: Use research-based knowledge and				
PO4	research methods including design of experiments, analysis and interpretation of				
	data, and synthesis of the information to provide valid conclusions.				
	Modern tool usage: Create, select, and apply appropriate techniques, resources, and				
PO5	modern engineering and IT tools including prediction and modeling to complex				
	engineering activities with an understanding of the limitations.				

	The Engineer and society: Apply reasoning informed by the contextual knowledge to
PO6	assess societal, health, safety, legal and cultural issues and the consequent
	responsibilities relevant to the professional Engineering practice.
	Environment and sustainability: Understand the impact of the professional
PO7	Engineering solutions in societal and environmental contexts, and demonstrate the
	knowledge of need for sustainable development.
PO8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities
100	and norms of the Engineering practice.
PO9	Individual and team work: Function effectively as an individual, and as a member or
109	leader in diverse teams, and in multidisciplinary settings.
	Communication: Communicate effectively on complex Engineering activities with
PO10	the Engineering community and with society at large. Some of them are, being able to
1010	comprehend and write effective reports and design documentation, make effective
	presentations, and give and receive clear instructions.
	Project management and finance: Demonstrate knowledge and understanding of the
PO11	Engineering and management principles and apply these to one's own work, as a
1011	member and leader in a team, to manage projects and in multidisciplinary
	environments.
	Life-long learning: Recognize the need for, and have the preparation and ability to
PO12	engage in independent and lifelong learning in the broadest context of technological
	change.

	Programme Specific Objectives (PSOs)						
PSO1	Professional Skills: The student will be able to apply the knowledge of Mathematics, Sciences and Engineering fundamentals to formulate, analyze and provide solutions to the problems related to Mechanical Engineering and communicate them effectively to the concerned.						
PSO2	Problem-Solving Skills: Design Mechanical systems in various fields such as Machine elements, thermal, manufacturing, industrial and inter-disciplinary fields by using various Engineering/technological tools to meet the mercurial needs of the industry and society at large.						
PSO3	Practical implementation and testing skills: The ability to grasp the latest development, methodologies of Mechanical Engineering and possess competent knowledge of design process, practical proficiencies, skills and knowledge of programme and developing ideas towards research.
